## **WIDE OPEN SPACES**

**If ever we are looking for a place to put the entire population of the world, it would be here in the wide open spaces of northern Utah and southern Idaho! As the photos show, the nothing in the land, and the abundance of water in the rivers.**

**We are now staying in beautiful Hells Gate State Park in Lewiston, ID. Yesterday, we passed thru the Nez Perce Indian Reservation. They appear to be doing very well with farming wheat and such other grains.**

**This seems to be one of the better reservations that we have relegated the Indians to live.**

**A little known fact is that southern Idaho is home to 300 species of birds, including Herons and Eagles.**
