## **OFF WE GO AGAIN**

**Another year, another trip, all be it to the same spots as last year with maybe a few differences.**

**Some changes are those that come with ageing, which we are trying to do gracefully!**

**Bonnie has been having trouble negotiating the high step heights to get in and out of the rig. I fashioned these half steps out of plywood, and now she can climb in without assistance. The only trouble is, that I am starting to need them too!**

**We are starting out easy. We have driven 87 miles and have spent 3 nights at the Acton Thousand Trails! If we don't hurry, we won't be past Oregon by October!**

**I cannot believe that the heater felt good this morning to take the chill off, now we have the air conditioner on full blast! Tomorrow we head for the coast at Pismo Beach. The rig seems to be running OK even with the 130,000 miles on it! Are we dumb or lucky!**

**Dave & Bonnie**
