BAD DAY AT BLACK ROCK, EH!

T was Brillig and the slithey toves.....
The morning of the dead Battery! The Honda would not arise! Don gave us a jump and we were on the way. We drove all the way to Quesnel and had lunch.

Don and I visited the Colby Pulp and Paper mill and took a one and a half hour tour. Was great!

We had to forge ahead to Prince George to a Sears store to get a battery.

We talked to a fellow who

Did gyre and gimble in the Wabe. All mimsey were the Borogroves and the Mome Wraths outgrabe!

had just gotten off the Cassiar Highway and he told us it is a nightmare trip. By the looks of his rig we believed him. His description of the road has changed our mind.

BATTERIES COST MONEY!

SMASH EM BEFORE YOU BLEED!

We are bypassing Dawson Creek. We were so late today we decided to pay camp at a private RV Park in PG.

We have hit mosquito country big time! Last night at the Provincial

Park they were the size of Horseflies! We had a campfire and ended up in the rig for a game of Train!

We didn't hit but a sprinkle of rain today. We saw two Bald Eagles today at Williams Lake.
